Heated Hose

Description

Graco's heated hoses are designed specifically for use with Reactor Equipment. Hoses are a key component to the total system, making it important to achieve accurate and uniform heating for the best application possible.

Advantages

- Provides 10-times* the flex life compared to previous flat copper heating element
- Long-term, even heating without hot spots
- Backwards compatible with existing Reactor heated hoses
- Made from urethane coated ballistic nylon for puncture and tear resistance, abrasion protection, and oil and water resistance
- Hook and Loop enclosure used on the entire length of the hose for easy access to the hoses, fittings, and fluid temperature sensors

**Disclaimer : The information provided is for representative purpose only
The specification of the machine selected by you may differ.**
